F&P 850™ System | Adult Care

The F&P 850 System has been designed to be simple to operate while answering a strong call for a high performing solution capable of operating in either Invasive or Noninvasive control modes.

Significant benefits flow from one system which can be configured to deliver optimal outcomes for all therapy needs.

Adult Invasive Ventilation

The MR850 humidifier, in combination with the MR290 Autofill Chamber and RT series breathing circuits cohesively ensures patient care and therapy efficacy for adult and paediatric patients requiring intubation.

The F&P 850 System is designed to deliver optimal humidity and includes a range of breathing circuits with ISO standard connectors. These connectors allow seamless connection to ventilators and patient interfaces. Fisher & Paykel Healthcare's exclusive Evaqua™ expiratory limb technology minimizes mobile condensate in the expiratory limb.

Adult Noninvasive Ventilation

The F&P 850 System for noninvasive ventilation is comprised of the MR850 humidifier with the MR290 Autofill Chamber and RT series breathing circuits with circuit step-down options. This system ensures exceptional performance for patients requiring noninvasive therapy.

Essential humidity is delivered to one of three types of FreeMotion™ mask. These are available as vented and non-vented full-face mask and vented nasal mask. The unique comfort and seal technologies minimize leak during patient movement.

Adult Optiflow™ and Oxygen Therapy

The MR850 Humidifier together with the MR290 Autofill Chamber and RT series breathing circuits complete a system which is unmatched in terms of humidity performance and patient tolerance to oxygen therapy.

The soft, flexible nasal prongs of the Optiflow Nasal Cannula are designed for comfortable prolonged use replacing the need for a face mask. Lightweight, flexible delivery tubing allows free movement during sleep and activity to make this a highly desirable, comfortable and unobtrusive therapy solution which delivers a wide range of flows to patients requiring oxygen therapy.

F&P 850™ System | Infant Care

Precious new life deserves the best possible start. From first breath to respiratory independence, the F&P 850 System helps to emulate the natural physiological balance in healthy, mature lungs.

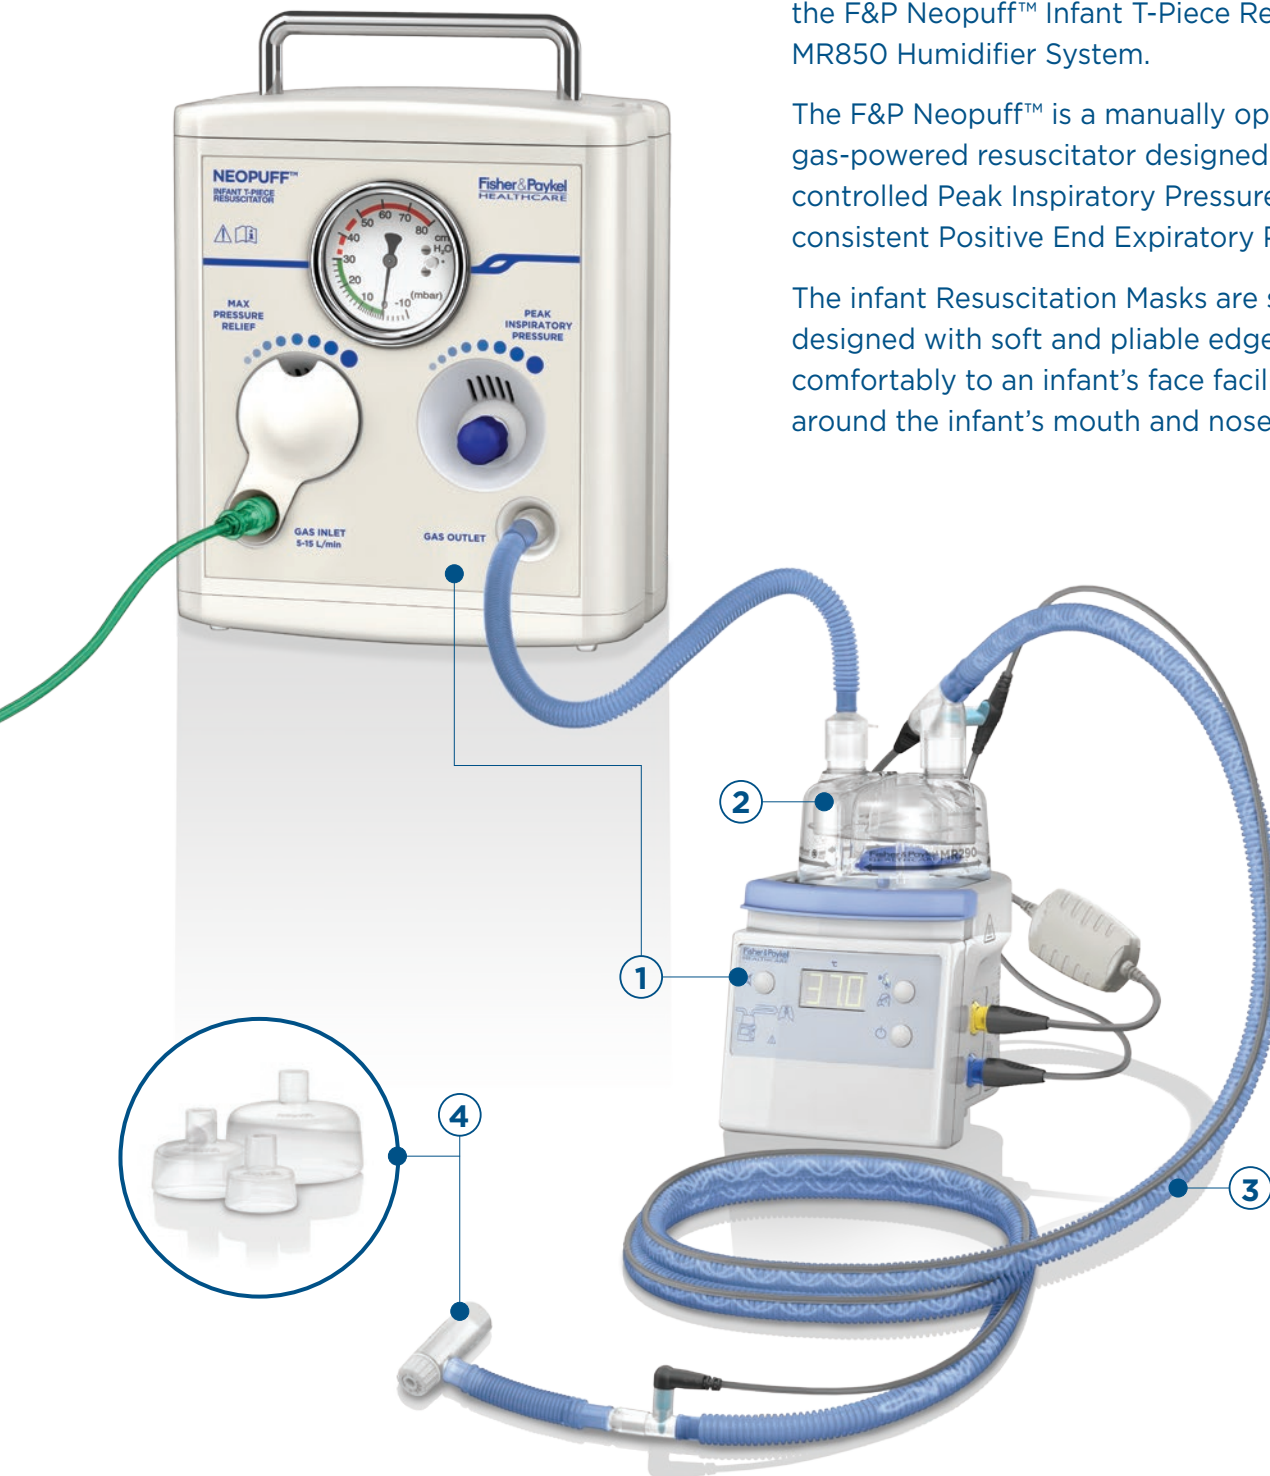

As a result, caregivers can nurture life, confident they are using the best therapy solutions, delivered in the safest, most efficient ways.

Infant Resuscitation

T-piece Resuscitation with Optimal Humidity (heated and humidified gas) can be delivered with the F&P Neopuff™ Infant T-Piece Resuscitator and MR850 Humidifier System.

The F&P Neopuff™ is a manually operated, gas-powered resuscitator designed to provide controlled Peak Inspiratory Pressure (PIP) and consistent Positive End Expiratory Pressure (PEEP).

The infant Resuscitation Masks are specially designed with soft and pliable edges to conform comfortably to an infant's face facilitating a seal around the infant's mouth and nose.

Infant Noninvasive and F&P Bubble CPAP™

Fisher & Paykel Healthcare developed the Bubble CPAP System for use with spontaneously breathing infants requiring respiratory support.

The F&P Bubble CPAP System incorporates unique features and world-leading humidification technology to provide a respiratory support system that is effective and easy to use.

The F&P Infant Interface complements the Bubble CPAP System, providing comfort and optimal CPAP support to the infant at risk using nasal prongs or nasal masks.

Infant Optiflow and Oxygen Therapy

The combination of Optimal Humidity and nasal cannula provides comfortable, effective oxygen delivery of greater oxygen flows than previously possible.

Infant Optiflow is delivered with the MR850 System and a range of nasal cannula that can deliver flows up to 8L/min.
